

## Other Schools That Have Benefited From The Program!

Pioneer Catchment & Landcare has helped with school projects across the region for many years. From planning gardens to educational class talks and hosted school outings, we work hard to make kids happy in nature.

Here are some recent examples of PCL supported schools:

### ***Mackay Christian College (MCC)***

#### ***Vines Creek Wetland Project 2018-19.***

PCL & MCC working with the Great Barrier Reef Marine Park Authority, secured funding through the Reef Guardian School program to enhance the natural values of the schools wetland. PCL has worked closely with MCC from writing the grant proposal, planning the revegetation, hosting a planting day with the students, and planning/installing a new sign for the wetland.

### ***Great Northern Clean-up***

PCL hosts a Great Northern Clean-up site every year, and works with local schools to get kids giving back to the environment. Photographed below is the team from the 2018 clean-up event. Made up of landcare volunteers, and schools students. Students from St Patrick's College have been working with PCL on this site for over 10 year!

### ***Schools Tree Day***

Each year schools come together to revegetate areas of our region. Schools can attend the annual event run by the Mackay Regional Council. Or we can arrange to do a planting day on your school grounds, which help kids take ownership of the plants. Photographed below are students from St Francis getting educated on tree planting before getting to put the plants in the ground.

### ***Nursery Activities***

Schools can arrange to have propagation activities at the Mackay Natural Environment Centre Nursery. Students can learn about native tree propagation, and get their hands dirty through guided educational activities, suitable for all school age groups.

### ***Is my school eligible?***

PCL operates in the Mackay Region: south of Mackay to Sandy Creek, north to Alligator Creek, and west to the top of the region in the Clarke Range. If your school is within this area, we can help you.

If your school is south of Sandy Creek, please contact Sarina Landcare Catchment Management Association (SLCMA) for support.

Many schools across the Mackay Region have already benefited from Pioneer Catchment & Landcare's support.

It is great for the kids, and helps the school work into a greener, brighter future.

If you want our help, you only have to ask!

*Students from Mackay State High School & St Patrick's College (both Reef Guardian Schools) lining up for a free private screening of the film '2040' for climate week.*

*Students from Mackay Christen College planting a new revegetation at the school, thanks to Landcare, the Reef Guardian Program, and support from the MRC.*
